

Quality

at the highest stage

PURemission
air protection system

**With PURemission
Häcker Küchen is setting
new exceptional standards.
From now on all wooden
products are even stronger
formaldehyde reduced.**

**Significant lower deviation
of the limits**

Even better ambient air

Improved quality of life

Through careful selection of timber materials and suppliers, Häcker Küchen succeeded in complying with the strong emission guidelines of the United States of America, according to CARB2 (93120) and TSCA title 6. The maximum values of the European guidelines for emission class E1 are adhered to or rather significantly undercut. With PURemission Häcker Küchen is setting new exceptional standards. For a quality at the highest stage.

PUResist
water protection system

**PUResist is the innovative
bonding technology for all
edges, guarantees
water-repellents and
resistants.**

**Ideal protection against moisture
penetration, e. g. at the cooking
and the sink area**

**Outstanding look
with invisible joints**

**Stronger adhesion between the
wooden material and the edges**

Häcker Küchen consistently uses the premium PUResist bonding technology for all edges. A polyurethane reaction adhesive free from formaldehyde and solvents is used for this. This technology is the perfect complement to PURemission. The all-round protection for your kitchen and for you.

Häcker
kitchen.germanMade.

**Häcker Küchen makes a
contribution to the protection
of the natural basis of life and
a constant improvement of
the environmental
performance and
sustainability.**

**Modern environment and quality
management system based on
DIN EN ISO 14001:2009**

**Energy management system
based on DIN EN ISO 50001**

**Certification audit according to
the guidelines of the PEFC Council**

When it comes to waste disposal, Häcker Küchen focuses on recyclable materials. In the area of conservation of resources Häcker Küchen sets a high value on modern and energy-efficient installation engineering and lives its environmental policy in the highest sense of entitlement for humans and nature.
